

**NRSP**

*Occupational  
Health  
and Safety  
Policy*

## **Occupational health and safety (OHS)**

NRSP and its executing entities ensure that appropriate occupational health and safety measures are applied at the workplace, field or community infrastructure sites to avoid any potential hazards to the staff and/or community as well as contract workers. Such measures will become even more stringent when the staff or project personnel are engaged in disaster management activities.

All contractors and third-party vendors will also be made responsible to take appropriate occupational health and safety measures, especially when engaged in NRSP financed activities. Such measures will be commensurate with the severity of risks identified during the social and environmental assessment.
